PO-internal-code	Those are topic's number created by the database internal software	
Polish	t=1814	Polish records translations
Russian	t=335	Russian records translations
Latin	t=1759	Latin records translations

Within each topic, browsing is done with at most 15 units (whatever that means) making one page  
 It appears in the left top corner of the screen, under topic name. For example:

**Goto page 1, 2, 3 ... 57, 58, 59 Next**

Knowing the starting point of each topic, and the number of units-pages preceeding the one within which you can find "your translation", one may reconstruct an URL of that page.  
 That helps very much to find what one is searching for in long topics

Assume:

<b>SCAN-name</b>		1867_m_karolina_schmidt_dalman__63_101.jpg
<b>URL-of-SCAN</b>	is calculated	<a href="http://polishorigins.com/forum/files/1867_m_karolina_schmidt_dalman__63_101.jpg">http://polishorigins.com/forum/files/1867_m_karolina_schmidt_dalman__63_101.jpg</a>
<b>PO-internal-code</b>		t=1814
<b>PO-p#</b>		58
<b>URL-of-TRANSLATION</b>	is calculated	<a href="http://polishorigins.com/forum/viewtopic.php?t=1814&amp;postdays=0&amp;postorder=asc&amp;start=870">http://polishorigins.com/forum/viewtopic.php?t=1814&amp;postdays=0&amp;postorder=asc&amp;start=870</a>
